

BELMONT GETS QUEENS TROLLEY

Scheme Means Connection with Manhattan by Means of Subway and Tunnel Under Forty-second Street and East River.

Against Belmont has completed the long considered plans for the acquisition of the New York and Queens County trolley system and its connection with Manhattan by means of the East River.

This system will bring immediate connections between the Manhattan subway and the Queens system of trolleys which have already passed into the control of the Belmont syndicate.

The enterprise was recently brought to a focus by the purchase by the Belmont syndicate of the majority of the shares of stock of the New York and Queens County Railroad, believing there was no other bidder, had refused to pay the price demanded.

The Belmont syndicate was to have acquired the system with the intention of making the trolley road a feeder to the large terminal to be built in Queens. With the road went the franchise to tunnel under the East River, which the owners of the trolley road had secured and begun active work on when an explosion in the initiatory work stopped the project.

The Belmont syndicate will now resume work on this tunnel with the understanding that the company shall receive from the Rapid Transit Commission authority to proceed with the Forty-second street subway, which will make the extension from Queens into Manhattan complete. It is understood that Mr. Belmont will address the Rapid Transit Commission to-day in reference to the matter, either personally or by letter, and will also make application for the needed permission to begin the work of the subway-tunnel connection.

The New York and Queens County Company owns about one hundred and fifty miles of tracks and carries about 1,000,000 of passengers a year. Its various routes cover a vast portion of Queens, including such centers as Astoria, Flushing Meadows, Woodside, Elmhurst, Newtown, Corona, Flushing, College Point and Jamaica. The company's right to tunnel under the East River was granted by the State in 1890, and it is now being renewed. It was learned to-day that the Belmont syndicate is ready to go ahead with the work of connecting Queens and Manhattan by tunnel, and as soon as the Rapid Transit Commission grants the franchise for the Forty-second street subway.

The Belmont syndicate is now in the hands of the Belmont syndicate, and the Belmont syndicate is now in the hands of the Belmont syndicate. The Belmont syndicate is now in the hands of the Belmont syndicate, and the Belmont syndicate is now in the hands of the Belmont syndicate.

SAN DOMINGO STILL THINKS IT'S AT WAR

Belligerents Impolite Enough to Keep on Firing While Cherokee Was Peacefully Steaming to Custom-House.

The Clyde line steamer Cherokee arrived from San Domingo to-day and looked at pier 5, Independence Street, South Brooklyn. She experienced rough weather for the greater part of the trip. Eight passengers landed from the Cherokee, which carried a very heavy cargo.

Capt. Daniel Archibald said to an Evening World reporter: "There is always great excitement in the Domingo country. If it isn't one revolution or rebellion it is another. When we left the greatest excitement prevailed, for the people did not know just where they stood or what was coming next."

The United States warships Hartford, Detroit and Columbia were seen at various ports. The Cherokee left after the firing on the Yankee's launch. The Cherokee was not molested, and was able to discharge and load cargo without trouble.

Purser M. Cuddy said he was obliged to go up the river at San Domingo City in a small boat to visit the Custom-House, and while passing up a continuous firing was kept up by the combatants, stray bullets making the trip up the narrow river dangerous.

Causes of Cancer. Harry Morris, an Englishman who has given much attention to the subject of cancer, recently called attention to the pernicious influence of the clay pipe and the decayed tooth in causing cancerous growths.

Have It Out With Us.

We do not refer to that troublesome tooth, because it is against our policy to extract any tooth that by any method known to dental science can be saved. We do mean that you, like many others, are laboring under the mistaken idea that we, as advertising dentists, do cheap work at cheap prices. This is an error. Our prices are unusually low, but with reason. The great volume of our business enables us to manufacture our own materials, and thereby save you 75 per cent of the charge for mechanical work made by private practitioners.

We employ only registered graduate dentists of wide experience, absolutely qualified to do work with all the attention that a patient receives anywhere. We guarantee to keep in perfect repair for 10 years every bit of work that leaves our hands. This guarantee is embodied in every contract that we make. Extractions absolutely free. Gold fillings from \$1.00; plates from \$2.00; braces, \$5.00 to \$10.00. Established 1890. Ladies' attendants. Established 1890. Ladies' attendants. Established 1890. Ladies' attendants.

Frederick Loeser & Co.

In every detail the Leading Retail Establishment of Brooklyn.

A Storeful of Startling Values to Celebrate To-morrow.

To-morrow is marked on your calendar in red—the printer's way of indicating a holiday. To-morrow will deserve a red mark on the Store's calendar because in each department extraordinary efforts have been made to present opportunities for economy that are beyond all precedent.

It is a tale told in tabloids—space limitations have crowded the announcements of tremendous values into smaller compass than they deserve. But for the men who have a holiday and can come to the Store; for women, for children, for everybody—these tabloids tell of offerings which are vital in their interest. Read them carefully.
